## our menu

**At McDonald's®** we are committed to providing high quality food, using the best raw ingredients, working with trusted suppliers and ensuring consistent preparation standards.

Our menu is based on staple foods such as meat, fish, potatoes, eggs, milk and grain. High quality ingredients are used and we source a significant proportion of our products from the UK.

As a family restaurant serving around 2 million customers in the UK every day, McDonald's highest priority is food safety. We will not use any product or ingredient that does not meet our own high standards of quality and safety, or that has not received the approval of the relevant UK and EU authorities.

We have a highly trained team of professionals who work very closely with our supplier partners to develop and maintain the highest possible standards of food quality, safety and traceability at every stage.

We have made many changes to our menu in recent years. In particular we have broadened the choice of menu items to include portions of fruit and vegetables. We introduced fresh fruit bags in 2004, and in 2005 we added carrot sticks to our menu, enabling Happy Meal customers to make a choice between a fruit bag, carrot sticks or French Fries at no extra cost. For Extra Value Meals there is now the choice between a Garden Side Salad or French Fries. We also offer a much broader range of non-carbonated drinks such as fresh orange juice, organic semi skimmed milk and water.

In 2007 we switched to using organic semi skimmed milk for all our teas and coffees and also now only use Arabica coffee beans that have been specially selected by our supplier from sustainable farms certified by the Rainforest Alliance™. In addition PG tips tea is now fully from Rainforest Alliance Certified™ farms.

We work closely with organisations such as the Food Standards Agency (FSA) to ensure our food meets, and where possible exceeds, government guidelines.

As part of our nutrition information initiative, since 2006, nutrition and GDA information can be found on product packaging. This is supported by further materials available in our restaurants and through interactive, personalised tools on our websites [www.mcdonalds.co.uk](http://www.mcdonalds.co.uk) and [www.mcdonaldsmenu.info](http://www.mcdonaldsmenu.info) that enables customers to make the right choices for them.

The ingredients for our menu are listed in the following pages. This information is updated regularly, although it will not include details of the promotional products that we offer from time to time. If you have a query about a food or drink item which is not listed, please contact our Customer Services team on 08705 244622.

Serving safe, quality food that our customers can trust is McDonald's number one priority. We believe that food safety and quality start at the farm and we have worked with colleagues across Europe to develop an Assurance Programme that drives sustainable agriculture and improves standards.

### **MAAP**

McDonalds Agricultural Assurance Programme (MAAP) allows us to ensure that food safety and quality are fully integrated into our production cycle right from the start. Supporting sustainable and ethical production conditions, the programme is closely measured in order to deliver year-on-year improvements and covers such areas as:

- Environment
- Agricultural Practices
- Animal Welfare
- Animal Nutrition
- Animal Medication
- Genetics
- Transparency

## our menu

MAAP is the cornerstone of our agricultural policy. Together with our global corporate responsibility and socially responsible food supply policies, McDonald's is working in partnership with its suppliers towards a sustainable future.

Our menu is based on staple foods such as meat, fish, potatoes, eggs, milk and grain.

# our menu

## Beef

All our hamburger products, including Big Mac<sup>®</sup>, Quarter Pounder with Cheese, Hamburger, and Cheeseburger, are made using 100% beef - whole cuts of high quality forequarter and flank. Individual beef burgers are prepared and packaged at McDonald's approved meat suppliers who undertake thorough quality checks on every batch. Nothing is added or taken away from the beef - preservatives, additives, binders or fillers are never used. In the restaurant, two-sided hot plates are used to cook the beef, so no extra fat is needed during cooking. After cooking, the beef is seasoned with a little salt and pepper.

McDonald's is proud to be one of the biggest purchasers of British and Irish beef – sourcing from over 16,000 British and Irish farms. Each of these farms are accredited by nationally recognised Farm Assurance Schemes, including Assured British Meats (ABM) and Assured Food Standards, as well as being audited against our own strict requirements. Audits are also carried out by both our suppliers and independent auditors. The entire supply chain is closely monitored to ensure the highest standards of animal welfare, safety and quality – giving us full control over all aspects of farming, including feed and animal welfare, and ensuring we are able to trace right back to the farms on which the livestock was raised.

In 2008 we were the winner of the RSPCA Good Business Award (restaurant chain category), which recognises our commitment to improving animal welfare.

## Chicken

The only chicken meat we use across our entire chicken menu, including Chicken Legend<sup>®</sup>, Chicken Selects, Chicken McNuggets<sup>®</sup>, McChicken<sup>®</sup> Sandwich, Mayo Chicken, Chicken Snack Wraps<sup>™</sup>, Chicken & Bacon Salads and Deli Choice Wraps and Sandwiches is carefully deboned chicken breast meat. We only use poultry producers who have been accredited and regularly audited by our suppliers. In the UK the poultry must be produced to at least the standards set by

nationally recognised Farm Assurance Scheme. We also source chicken from other countries in Europe as well as Brazil and Thailand. All these supplies must comply with our MAAP standards.

Strict animal welfare standards are in place, which have been developed with our chicken suppliers. The feed used for rearing our chickens is not genetically modified and is free from antibiotic growth promoters. Diets are carefully formulated by experienced nutritionists, with bird health regularly monitored by veterinary personnel.

The Chicken Legend is made from a high quality piece of whole muscle chicken breast fillet in a crispy coating that is infused with seasoning and spices. It is served in a 'rustic' brown roll with Batavia lettuce and a choice of sauce, Spicy Tomato Salsa or Cool Mayo. The McChicken Sandwich and Mayo Chicken contain carefully deboned breast meat in a light batter coating and are served in a toasted bun with sauce and lettuce. Our Chicken McNuggets, which are also made from carefully deboned breast meat, are coated in a specially seasoned batter and served with a choice of sauce portions. Our deli Chicken pieces are made from chicken breast meat, marinated in a grilled style marinade. Our Chicken Selects are made from marinated strips of carefully deboned whole muscle chicken breast meat coated in a seasoned flour breadcrumb and served with a choice of sauce portions or as part of our Chicken Snack Wraps. Our Chicken & Bacon Salad range uses either a Chicken Legend patty for the Crispy Chicken & Bacon Salad or deli Chicken pieces in the Grilled Chicken & Bacon Salad.

## Pork

All of our suppliers of pork comply with UK animal welfare legislation and are covered by a recognised Farm Assurance scheme, such as British Quality Pork and Assured Food Standards (Red Tractor Assurance Scheme), as well as being audited against our own strict requirements. All manufacturing facilities are audited by independent auditors, and our suppliers conduct quality checks on every batch.

Our bacon is made from prime cuts of pork belly or back, which is trimmed, cured and carefully sliced. Our sausage patties are made from prime cuts of pork and are lightly seasoned with herbs.

## Fish

The fish we use in our Filet-o-Fish® is filleted Alaskan Pollock or Hoki, and in our Fish Fingers it is filleted Hoki. Both fish are sourced from sustainable fisheries. No additives of any kind are used in the filleted fish and great care is taken to ensure that only high quality fish is used. Every effort is made to remove all of the bones from the fish.

Our Filet-o-Fish is served in a steamed bun with tartare sauce and a small slice of cheese.

## Eggs

Since the end of 2008 all of the eggs used across the entire menu are Free Range. We take great care to ensure that all of our free range eggs conform to the Lion Mark code of practice. Our suppliers are accredited by the nationally recognised Free Range Farm Assurance scheme. In 2006 and 2007 we received the “Good Business of the Year Award” from the British Free-Range Egg Producers’ Association, which recognises our commitment to free-range egg production in the UK. All the eggs we use come from hens fed on a non-GM diet free from artificial colourants.

## Potatoes

McDonald’s famous French Fries are produced from only the best quality potatoes such as Russet Burbank, Shepody and Pentland Dell - the vast majority of which come from the UK. These varieties are selected because of their unique shape and size, which leads to our characteristically long fries. They also grow really well in UK soil.

No flavourings are added to our French Fries apart from a little salt prior to serving. At certain times of the year when there is little naturally occurring sugar in potatoes, a light sugar solution may be used to ensure that our French Fries maintain their characteristic golden colour.

## Dairy Products

All of our milk for our Milkshakes, McFlurry™ desserts and Organic Milk Bottles is sourced from farms in the British Isles. We can trace all this milk right back to the farms where it came from. The main ingredient in our Milkshakes is semi-skimmed milk (approximately 75%).

Organic semi skimmed milk is used for all our tea and coffees and is available in individual 250ml bottles. Experts confirm organic milk provides higher levels of vitamin E, antioxidants and Omega-3 fatty acids than regular milk.

## Produce

We choose to use iceberg lettuce for our main sandwiches because of its sweet flavour, crisp texture and popularity, and we use at least five varieties of salad leaf in our Premium salads – which count towards 2 portions of your 5 a Day target for Fruit and Vegetables.

We encourage good environmental practice, for example, water recycling is used to irrigate the crops during the summer months, while the waste lettuce is used as compost.

In our Happy Meal option there is a choice between Apple and Grape Fruit Bags, Carrot Sticks or French Fries, and in our Extra Value Meals you can choose between a Garden Side Salad or French Fries. Each portion of salad, fruit or carrot sticks counts as 1 portion towards your 5 a day target for Fruit and Vegetables.

## our menu

### Sauces

All our sauces are specially formulated and pasteurised to reduce the need for extra chemical preservatives. We take great care to ensure wherever possible natural flavours and natural colours are used.

### Cooking Oil

The cooking oil used in the restaurants is a non-hydrogenated vegetable oil that is a blend of High Oleic Sunflower Oil, Sunflower Oil, Rapeseed Oil and High Oleic Rapeseed Oil. It is used to prepare the following products: Chicken McNuggets, Chicken Selects, Chicken Legend patties, McChicken Sandwich patties, Mayo Chicken patties, Filet-o-Fish portions, Spicy Vegetable patties, French Fries, Hash Browns and Apple Pies.

Since 1998 the levels of Trans Fatty Acids in our cooking oil have been reduced from 30% to below 2%. This is the lowest possible level that can be achieved because of the presence of naturally occurring trans fats in oils.

### Nut and other Food Allergies

We are aware of the serious health risk to people who are allergic to whole peanuts, nuts or nut derivatives. These are therefore excluded as ingredients from all the products described in this document. However, we are unable to categorically state that our products are 100% free of nuts or nut derivatives, because as with all food manufacturers there is always the possibility of cross-contamination at some point in the food chain. This also applies to sesame seeds.

Customers should note that this policy applies only to McDonald's restaurants in the UK. In the event that a promotional product contains peanuts, nuts or nut derivatives, this will be clearly labelled in the restaurant. (Please note, this policy does not apply to McCafés).

Full allergen details on all our products can be found on our websites [www.mcdonalds.co.uk](http://www.mcdonalds.co.uk) and [www.mcdonaldsmenu.info](http://www.mcdonaldsmenu.info) - United Kingdom.

If we can help by providing further information on any of our products, we will be more than happy to do so. Please contact our Customer Services team on 08705 244622.

### McCafés

McCafés serve an additional range of bakery products and drinks. McCafés are unique in that some products may contain nuts as ingredients and some of the products may have been produced in an environment where nuts are handled. Customers are made aware of the special situation in the McCafés through the use of product labelling, door stickers, a poster and stickers on the tills. All McCafé products are delivered to the restaurant in sealed packaging, to reduce the risk of cross contamination, however, some products that use nuts as ingredients may be opened and sliced within the McCafé.

For further information, please contact our Customer Services team on 08705 244622.

## Vegetarian Information

The following food products have been approved by the Vegetarian Society as suitable for vegetarians:

Hash Brown, Pancakes & Syrup, Plain Bagel, Oatso Simple, French Fries, Garden Side Salad, Balsamic Dressing, BBQ Dip, Heinz Tomato Sauce, Smokey BBQ Dip, Sweet Chilli Dip, Sweet Curry Dip, Sweet & Sour Dip, Belgian Bliss Brownie, Carrot Sticks, Double Chocolate Muffin, Fruit Bag, Ice Cream Cone with Flake, Low Fat Blueberry Muffin, McFlurry – Crunchie, McFlurry Dairy Milk, Strawberry Sundae, Sugar Donut, Toffee Sundae. Further details about which drinks are suitable can be found on the reverse of the trayliners in the restaurants.

Spicy Vegetable Deli Sandwiches and Wraps and Vegetable Deluxe are currently not approved by the Vegetarian Society for the following reason:

The vegetable patties are cooked in a non hydrogenated vegetable oil, in their own dedicated cooking vats. These vats are used exclusively for the purpose of cooking this type of product (i.e. a non meat / non fish product). The cooking vats are filtered manually using a strict order of rotation to minimise any chance that oil residues from the previous filtering could get into the vat used for vegetable patties. However during this manual process there is a possibility that tiny traces of the vegetable oil used to cook the chicken and/or fish products may come into contact with the vegetable oil used to cook the vegetable patties. In summary, whilst our Spicy Vegetable Deli Wraps and Sandwiches and Vegetable Deluxe products are not approved by the Vegetarian Society, they do not contain any meat or meat by-products and are cooked in a 100% vegetable oil, using ingredients that are suitable for vegetarians. Our

food development team is currently investigating alternative cooking methods and liaising with the Vegetarian Society with a view to seeking Vegetarian Society approval once a new cooking method is established.

Please note our French Fries, which have been approved by the Vegetarian Society, are cooked using different equipment and are entirely segregated from the other products.

McDonald's UK does not offer any products which are certified as suitable for Vegans. However there are various options on the menu that are suitable for vegetarian and vegan diets such as: French Fries, Hash Browns, Oatso Simple made up with water instead of milk, Garden Side Salad, Fruit Bag and Carrot Sticks and the sauces: Heinz Tomato Ketchup, Spicy Tomato Salsa, Sweet Chilli Dip or Sauce, BBQ Dip, Sweet & Sour Dip and Sweet Curry Dip.

For more information please visit [www.makeupyourmind.co.uk](http://www.makeupyourmind.co.uk) or [www.mcdonalds.co.uk](http://www.mcdonalds.co.uk).

## Genetically Modified Organisms

McDonald's highest priority is for the safety of our customers. We will not use any product or ingredient that does not meet our high standards of quality and safety, or has not received the necessary approval by the relevant UK authorities. We can confirm that we do not use any genetically modified products or ingredients containing GM material in our food. We will continue to monitor consumer and scientific developments in this area.

## Balanced Diet

At McDonald's we recognise the important relationship between a balanced diet, lifestyle and health.

Government guidelines for a healthy diet are based around "The eatwell plate", for more details visit the Department of Health website at [www.dh.gov.uk](http://www.dh.gov.uk) or [www.nhs.uk/Livewell](http://www.nhs.uk/Livewell)

The Government guidelines list 8 top tips for eating well which are:

1. Base your meals on starchy foods.
2. Eat lots of fruit and vegetables.
3. Eat more fish.
4. Cut down on saturated fat and sugar.
5. Try to eat less salt – no more than 6g a day.
6. Get active and try to be a healthy weight.
7. Drink plenty of water.
8. Don't skip breakfast.

Nutritional information can be found on the packaging of many of our popular items, as well as on the back of all trayliners, and also on our interactive websites [www.mcdonalds.co.uk](http://www.mcdonalds.co.uk) and [www.mcdonaldsmenu.info](http://www.mcdonaldsmenu.info).

## Guideline Daily Amounts

	Adult*	Child**
Energy (kcal)	2000	1600
Protein (g)	75	60
Fat (g)	67	62
Carbohydrates (g)	275	200

\* Adult figures are based on an average woman aged 20 – 30 years old who has a low physical activity level.

Child figures are based on a girl aged 4 – 7 years old with a normal physical activity level. For further information see website [www.mcdonaldsmenu.info](http://www.mcdonaldsmenu.info)

These websites provides nutrition and allergen information on all our products and allows you to calculate the nutrition content of your favourite meal combination to see how this fits in with your personal daily nutrition guidelines.

## Small Children – Safe Eating

Children need a balanced diet, including fruit and vegetables. Small children can choke on food, including some fruit such as grapes. It is important to always supervise small children while they are eating and to ensure that they eat when sitting down.

To minimise the risk of choking, food should be cut into small, non-round pieces (plastic knives are available on request in most McDonald's restaurants).
